ABSTRACT

<u>Title</u> : Method for organizing and consulting electronic
data in the environment of a media library

Method for organizing and consulting electronic data
in the environment of a media library, these electronic
data originating from a plurality of sources and
supplied in various forms.

It is configured to provide a function of universal
link between these various forms of electronic data in
such a way that said electronic data can be consulted,
stored and reused on common media within the media
library.

Use particularly for off-line consultation of
documents collected on the Web or from any document
resources
